

CIVIL ENGINEERING / CONSTRUCTION / MANAGEMENT

Strong foundations. Lasting impact.

Company profile

**ENGINEERING PROGRESS.
BUILDING COMMUNITIES.**

South African expertise. A shared commitment to quality, efficiency and safety.

01 / WHO WE ARE

Built on expertise. Driven by purpose.

MEL Engineering (Pty) Ltd is a South African construction company focused on civil engineering, project management, facilities management, building and roads construction.

Our team brings hands-on experience across multidisciplinary construction and consulting engineering. We deliver professional, high-quality services with a focus on value for money and practical results.

As a 100% Black Economic Empowerment company, we are committed to capacity building and participation in transformative projects. Strategic alliances with established companies support our BEE principles and the growth of small and medium enterprises.

02 / THE PEOPLE BEHIND THE WORK

Experience that guides the work.

MANAGING DIRECTOR

Mr. Kamohelo T Moeti

N Dip (Eng) Civil / PGDBM / MBA

Mr. Moeti has more than eleven years of project management experience in infrastructure development, civil works, refurbishments and asphalt paving, as described in the supplied profile. He holds an MBA and PGDBM from MANCOSA and a National Diploma in Civil Engineering from the University of Johannesburg (formerly Wits Tech).

His career includes bulk earthworks experience on Anglo American's Isibonelo colliery, SASOL's Ithubelisha colliery and SANRAL's Gauteng Freeway Improvement Project. This experience informs his leadership of the roads and earthworks division.

OUR MISSION

Improve. Deliver.
Take responsibility.

Develop our team's skills, improve our services and deliver safe, innovative and cost-effective engineering solutions.

OUR VISION

Build opportunity.
Create lasting value.

Create job opportunities and grow as a trusted engineering and construction partner, known for reliability and sustainable progress.
